

Braindump – Individual Brainstorm

What

Brainstorming (group sessions) has three siblings which you should get to know: **Braindumping** (individual sessions), **Brainwriting** (a mix of individual and group sessions) and **Brainwalking** (another mix of individual and group sessions).

Should Your Team Brainstorm as a Group or as Individuals?

Best practice:

Switching between the two modes of individual and collective ideation sessions can be seamless—and highly productive. Alex Osborn's 1950s classic *Applied Imagination* gave advice that is still relevant: Creativity comes from a blend of individual and collective ideation.

It's often a good idea to do individual ideation sessions like braindumping, brainwriting and brainwalking before *and* after brainstorming group sessions. We recommend that you mix the methods: Brainstorming, Brainwriting, Brainwalking, and Braindumping.

Why

One of the best ways to progress to more advanced levels of ideation is to start by getting everything that's currently clogging the neural pathways out in the open and freeing up some cognitive space for other synapses, connections, and mixtures to get through. David Allen, author of the world famous *"Getting Things Done"* methodology, swears by the braindump as a means to free up mental energy and allow freethinking. Holding onto your own thoughts, unfinished tasks, or unexplored ideas creates mental blockages and prevents freethinking. Furthermore, Braindump is an amazing technique to help quiet employees get a voice.

Best practice: How

- If you were the facilitator, you'll brief ideation participants upfront on the problem statement, goals and important insights from previous research and findings.
- Then ask all participants to write down their ideas as they come.
- It's important that each participant does this individually – and silently.
- Provide participants with sheets of paper, idea cards or traditional Post-it notes. Sticky notes are great, because they allow people to write their ideas down individually – one idea per note.
- Give participants between 3 and 10 minutes to get ideas they have been thinking of off their chests.
- After reaching the time limit of approximately 3-10 minutes, each participant will say a few words about his or her ideas and stick them on a board or wall. You should avoid initial discussions about notes when team members are presenting them. Ideas that come out of early braindump sessions should be shared verbally with the entire team in order to spark new streams of thinking or combinations of ideas.
- While sticking the ideas up and presenting them, the group will also group duplicates together.

- When all team members have presented their ideas, you can select the best ideas, which you can continue to build and elaborate on in other ideation sessions. There are various methods you can use such as “Post-it Voting”, “Four Categories”, “Bingo Selection”, “Six Thinking Hats”, and “Now Wow How Matrix”.

Do you want to learn more?

Learn how to use this template to your best advantage in our online course [Design Thinking: The Beginner's Guide](#). Sign up for it today and learn how to apply the Design Thinking process to your project if you haven't already started the course.

Design Thinking: The Beginner's Guide

Beginner course

The world's leading companies, such as Apple, Google and Samsung, are already using the design thinking approach—because they know it's the way forward when it comes to innovation and product success. Through [Design Thinking: The Beginner's Guide](#), you will deep dive into the five phases of this paradigm-shifting approach to problem-solving—empathize, define, ideate, prototype, and test. By receiving detailed guidance on problem-solving activities ranging from ideation techniques—such as brainstorming and using analogies—to ways of gathering feedback from your prototypes, you'll be able to download the other templates involved and effectively use them in your work. Get ready to unpack, explore, and master design thinking—using it to set yourself apart and unlock the next stage of your professional life.

About the Interaction Design Foundation

INTERACTION DESIGN
FOUNDATION

With over 66,000 alumni, the Interaction Design Foundation is the biggest design school globally. Industry leaders such as IBM and Adobe train their teams with our courses, and universities such as MIT and the University of Cambridge include our courses in their curricula. Our online courses are taught by industry experts and cover the entire spectrum of UX design from beginner to advanced. We give you industry-recognized course certificates to advance your career. Since 2002, we've put together the world's biggest and most authoritative library of open-source UX Design literature created by such noted authors as Don Norman and Clayton Christensen.
