

Worst Possible Idea

What

The Worst Possible Idea method is a fun and effective ideation icebreaker technique. However, your team may also very likely be able to extract and come up with amazing ideas from really bad ideas. The Worst Possible Idea is a lateral thinking method which is very much about standing back, looking at the big picture, and understanding concepts. It also requires that you focus on the parts that have perhaps been overlooked, challenging assumptions, and seeking alternatives. This method of the Worst Possible Idea produces novel combinations or completely new ideas. With ideas, one leads to another, bad ideas lead to good ones, sometimes in ways we could never have imagined. At times, the best idea stems from its exact opposite—the worst. This is why the Worst Possible Idea is actually an ideation method, one which you can use to provide disruptive insight within the ideation process.

Why

Instead of going for good ideas and putting the pressure on, call for the worse and, yes, the worst possible ideas your team can come up with. Doing this relieves the anxiety and self-confidence issues and allows people to be more playful and adventurous, as they know their ideas are most certainly not going to be scrutinised for missing the mark. It's way easier to say 'Hey no that's not bad enough.' than the opposite. Better still, it helps ensure that mental constipation is never responsible for keeping a breakthrough idea from getting out into the open.

Best Practice: How

- 01:** The facilitator briefs the ideation session participants about the problem statement (also called Point Of View), the overall goals and important user insights.
- 02:** Then the facilitator asks the participants to come up with the worst possible ideas they can think of. There should be permission given to revel in unusable, impractical, stupid or foolish ideas; ones that are nonsensical, ridiculous, incorrect, mismatched, and against known best-practices, laws or guidelines. The intention is not necessarily to descend into toxic or gratuitously offensive concepts (the facilitator will need to use their judgement to keep the ideation session happy and healthy) but to escape constraints by opening the mind. You can do this as a collective brainstorm session, or you can ask all participants to write down their worst ideas individually—this method is called Braindumping. You could also use the Brainwriting method, where each participant fills out idea cards/papers with their worst possible ideas for 3–5 minutes and then passes on the idea card to another participant, who elaborates on their worst possible ideas, and so forth.
- 03:** As the facilitator, be sure to push your group to generate extremely bad ideas! This will help get participants laughing and re-engaged. As a facilitator of ideation sessions, it's your job to help participants open their minds and hearts, and the Worst Idea method can help you do just that—especially if you combine it with the collective Brainstorm method.
- 04:** The technique includes generating as many terrible ideas as possible.
- 05:** It includes listing the attributes of the worst ideas.
- 06:** Investigate which attributes of the ideas make them really bad.
- 07:** Once the participants have generated a list of their worst ideas, you as the facilitator should challenge the group to turn those horrible ideas into good ones. They can either consider the ideas' opposites or look for aspects within the terrible ideas that might inspire a good one. Or, you can consider simply removing the worst attribute and replacing it with something else. Mix and match different bad ideas, and see what comes out.

Learn More About How to Use This Template?

Methods of using this template are taught in our online course [Design Thinking: The Beginner's Guide](#). Make full use of this template and learn more about design thinking by signing up for it today.

Design Thinking: The Beginner's Guide

■□□ Beginner Course

The world's leading companies, such as Apple, Google and Samsung, are already using the design thinking approach—because they know it's the way forward when it comes to innovation and product success.

Through [Design Thinking: The Beginner's Guide](#), you will deep dive into the five phases of this paradigm-shifting approach to problem-solving—empathize, define, ideate, prototype and test. By receiving detailed guidance on problem-solving activities ranging from ideation techniques—such as brainstorming and using analogies—to ways of gathering feedback from your prototypes, you'll be able to download the other templates involved and effectively use them in your work.

Get ready to unpack, explore and master design thinking—using it to set yourself apart and unlock the next stage of your professional life.

How to Advance Your Career With Our Online Courses

Take Online Courses by Industry Experts.

Lessons are self-paced so you'll never be late for class or miss a deadline.

Get a Course Certificate.

Your answers are graded by experts, not machines. Get an industry-recognized Course Certificate to prove your skills.

Advance Your Career.

Use your new skills in your existing job or to get a new job in UX design. Get help from our community.

About the Interaction Design Foundation

With over 66,000 alumni, the Interaction Design Foundation is the **biggest design school globally**. Industry leaders such as IBM and Adobe train their teams with our courses, and universities such as MIT and the University of Cambridge include our courses in their curricula. Our online courses are taught by industry experts and cover the entire spectrum of UX design from beginner to advanced. We give you industry-recognized course certificates to advance your career. Since 2002, we've put together the world's biggest and most **authoritative library** of open-source UX Design literature created by such noted authors as Don Norman and Clayton Christensen.
